

# RAZEEBUSS RADICALL

## SPECIFICATIONS :

Radicall XC electric unit is based on a SUP'AIR Skypper pod harness , it's a carbon chassis supporting a Geiger engineering HPD12 E-Drive unit equipped with 130 cm carbon folding propeller .  
The main prupose of these auxiliary unit is to prolong a thermal flight .  
The propeller folds away when not use so it doesn't destroy the aerodynamics of your pod harness and be used when it's needed to avoid a potential landing situation and keep you airborne .  
The power unit doesn't affect any other aspects of the Skypper harness , which has the same speed bag , integrated reserve , speed bar , etc as an off-the-shelf Skypper .  
Radicall Unit can launch a paraglider form a flat field , even in light wind condition and that it is very similar to a regular parmotor .

## TECHNICALS FEATURES :

Harness SUP'AIR Skypper  
Build-in composite chassis  
HPD12 Geiger engineering E-Drive  
130 cm carbon folding propeller  
Flylink PIWI 2 hand throttle  
Kokam LIPO 24AH battery pack Kokam with BMS( Batterie Management System )  
220-110 battery charger  
Static Thrust : 68 kilos  
Weight ready to fly : 27 kg ( including reserve )

Flight duration at cruising altitude : 25 to 30 minutes  
Climb rate : up to 2m/s

**Prices : 12500,00 € ( excluding taxes )**  
**Unit ready to flight with 24 ah battety pack and Charger**  
**( not including reserve )**
